CHOICE HARDY PERENNIAL PLANTS

QUALITY

MY plants are field grown; that is, they are grown out of doors from start to finish. They have been in the ground all winter; consequently there is no question as to their hardiness, and they may be planted out as soon as the ground is dry enough, the earlier the better; late frosts will not harm them at all.

They are grown from the best strains obtainable from European and American plantsmen, and are unsurpassed in quality.

All plants sent out are of blooming size, and the great majority are large, field grown clumps.

If further information is desired, I am always glad to answer any questions.

SHIPMENT

Unless directed otherwise, plants will ordinarily be sent by express, the customer paying the carriage charges. If desired by parcel post, ten per cent should be added to the remittance. Any balance will be refunded.

TERMS

This price list cancels all previous quotations.

New customers will kindly send remittance with order. If credit is desired, please send references and allow me time to hear from them.

Not less than six plants of one variety are sold at the dozen rate; not less than fifty plants of one variety are sold at the 100 rate.

SPECIALTIES

CAMPANULA PERSICIFOLIA "TELHAM BEAUTY"

This plant appeared some years ago in one of the great English gardens and was imported into the United States in 1919 before the quarantine went into effect. It is the finest form of the peach-leaved Bellflower known, bearing flowers of beautiful form and color and of extraordinary size. It is still very rare in the United States as it cannot be grown from seed and can only be propagated by division.

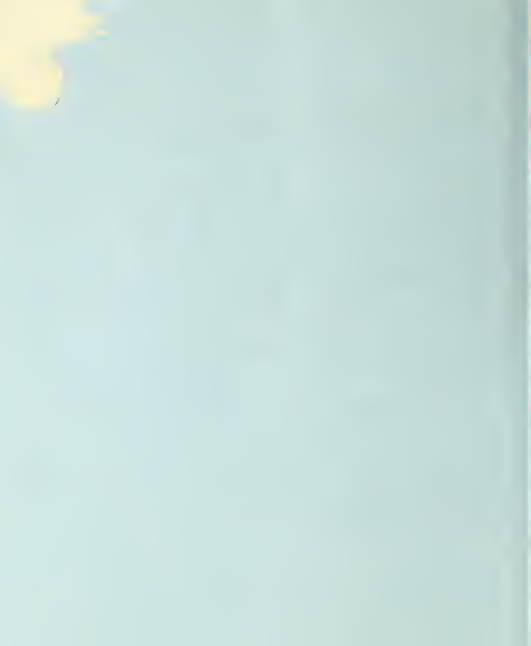

I am fortunate in having the true stock and shall be able to offer plants next summer.

Award of Commendation from New York Horticultural Society, June, 1931.

Early Orders

With all orders received before the 15th of March, ACCOMPANIED BY CASH, five per cent of the catalog price may be deducted from the remittance.

The plants will be forwarded at any time you direct, or, if no instructions are given, when the planting season opens.

CAMPANULA PERSICIFOLIA

(Peach-leaved bellflower)

This great border plant is too seldom seen in all the beauty of which it is capable. Its outstanding characteristics are the clear, pure colors and delicate texture of the open bells, which are borne on three to five foot stalks and bloom in June and July.

My plants have been selected from named varieties of Ladham's Giant Hybrids. The flowers are much larger than ordinary varieties and are carried on tall stout stalks, making an outstanding plant of striking beauty.

These campanulas do well in a partly shaded situation, and like a rich, rather heavy soil with plenty of lime. They need frequent division or else the many growths sent up will exhaust them. The best covering in winter is a two-inch layer of peat moss. Under this blanket the foliage will stay fresh and green all winter.

| | | |
|--------------------|-------|-----------------------------------|
| Large Clumps | Blue | } \$5.00 a dozen. \$35.00 for 100 |
| | White | |

DIGITALIS (Foxglove)

Foxgloves should be planted as early as the ground can be worked so that they may become established before blooming time in June. Rich ground with plenty of humus, and some shade suit them. Below I offer two strains of unusual beauty.

LUTZ HYBRIDS Tall spikes of pink flowers, ranging from flesh color to rose.

SUTTON'S GIANT PRIMROSE Very large flowers of deep cream color.

Both Foxgloves \$3.50 a dozen. \$25.00 for 100

HOLLYHOCKS

Hollyhocks need full sun, and rich soil that has been prepared to a depth of eighteen inches, as the roots are large and go down deep.

PINK BEAUTY Large, very double flowers, of a beautiful clear salmon pink. \$3.50 a dozen. \$25.00 for 100

PRIMROSE BEAUTY Large, very double flowers, pale yellow. \$3.50 a dozen. \$25.00 for 100

IMPERATOR A recent introduction. Flowers five to six inches across, the outer petals fringed and frilled, and in the center a very double rosette. Mixed colors only.

\$5.00 a dozen. \$35.00 for 100

QUEEN OF SHEBA A recent introduction and a very beautiful hollyhock with very large and very double buff colored flowers with rosy centers.

\$5.00 a dozen. \$35.00 for 100

SCABIOSA CAUCASICA

(Blue Bonnet)

Remarkable improvement has been made in this plant of late years, and it has been developed from a pretty but somewhat nondescript flower into one of the most beautiful we have. The delicacy and refinement of form have been retained, but the pale, wishy-washy color has been transformed into beautiful shades of blue and lavender, the flowers much increased in size, and the petals ruffled, while the stems have been lengthened and strengthened. They are exquisite cut flowers and will remain in good condition for a long time. The crowning merit of Scabiosa is that it blooms incessantly all summer and up to heavy frost.

Culture is simple. The main requirement is full sun and plenty of lime in the soil. To increase, divide the roots very early in spring.

\$5.00 a dozen. \$35.00 for 100

SWEET WILLIAM

(Dianthus Barbatus)

Those who know only the old time Sweet William will be surprised and delighted with the newest developments of this old favorite, with the great increase in the size of the flowers and with the delicacy of coloring.

SUTTON'S PINK BEAUTY A beautiful salmon pink.

\$3.00 a dozen. \$20.00 for 100

SUTTON'S FAIRY A very delicate salmon pink, much lighter than Sutton's Pink Beauty.

\$3.00 a dozen. \$20.00 for 100

SUTTON'S GIANT WHITE Enormous trusses of clear white flowers that might be mistaken for phlox.

\$3.00 a dozen. \$20.00 for 100

TROLLIUS LEDEBOURI

(Globe Flower)

T. Ledebouri is distinguished from the rest of the Trollius family by flowering in June instead of in early spring, and by its large open flowers and tall stature. The flowers are borne on three-foot stems and are a glowing orange gold that is very beautiful, and with the dark green, deeply cut foliage make a most handsome plant. It will grow in sun or shade but it must have plenty of water during the growing season. For this reason some peat moss in the soil is beneficial. To increase divide after flowering.

\$5.00 a dozen. \$35.00 for 100

VIOLAS

(Tufted Pansies)

No other plants will give a greater return to the gardener for the time and trouble expended than the violas. They are the easiest of plants to manage, and if their few requirements are met they will give a wealth of flowers of lovely colors from earliest spring until heavy frost.

They need good fresh soil that is deeply dug so that the roots may go down to find coolness and moisture. Contrary to the usual practice they should be planted in full sun, but never allowed to become dry, and they should not be allowed to go to seed.

VIOLA "JERSEY GEM" No viola has yet appeared to surpass this in value to American gardens. It will stand hot summers and drought as will no other member of the family. The rich, violet flowers bloom profusely all summer.

To propagate, lift the old clumps in autumn or in early spring and divide into a number of pieces, each of which will grow quickly into a blooming plant. It is wise to divide every year as young plants are more vigorous and will bloom more freely than old clumps.

\$3.00 a dozen. \$20.00 for 100

VIOLA "APRICOT" Large, circular flowers of a lovely rich apricot, deepening into brilliant orange in the centre. The only viola in existence of this distinctive color.

\$3.50 a dozen. \$25.00 for 100

VIOLA "MAGGIE MOTT" This viola has been a great favorite in its home country for years, and visitors to the English gardens invariably return enthusiastic admirers of its loveliness. The flowers are very large and a beautiful pinkish lavender in color. My plants are necessarily grown from seed and therefore the color will vary, but all are exquisite shades of lavender.

\$3.50 a dozen. \$25.00 for 100

A good way to manage both the "Maggie Mott" and "Apricot" violas is, at the end of the summer, to spread out the flowering stems, which by this time have become very long and "leggy," and pin each one down to the ground with a hair-pin. New growths will spring up in the center, and these will be the blooming stems next spring. In this way each plant will cover a square foot of space.

VIOLA ODORATA "ROSINA"

This lovely little violet of American introduction is becoming more and more popular as it becomes better known. It is a true hardy violet, with single flowers, soft pink in color, and possessed of the most delicious perfume of which a violet is capable.

"Rosina" blooms outdoors in early spring and again in autumn until heavy frost. Last year my plants were continuously in bloom from early September until long after Thanksgiving Day, the flowers becoming larger, the color deeper and the stems longer, as the weather became cooler. It is a strong grower and should be divided every other year. It may be planted in full sun but it prefers some shade in summer. Its chief requirements are rich soil and plenty of moisture. It is very hardy and in winter needs only the usual protection of straw or some peat moss.

Award of Commendation, New York Horticultural Society, October, 1931.

\$5.00 a dozen. \$35.00 for 100

G E N E R A L L I S T

Not less than six plants of one variety are sold at the dozen rate; not less than fifty plants of one variety are sold at the one hundred rate.

| | Doz. | 100 |
|---|---------------|----------------|
| ACONITUM (Monkshood) | | |
| WILSONI The finest of all the Monkshoods. From September to heavy frost its noble spires of bloom, rising to seven feet and more and covered with quantities of lavender blue hoods, dominate the border. It needs rich, heavy soil and plenty of moisture. Either sun or shade will suit it. | \$7.50 | \$60.00 |
| ANCHUSA (Alkanet) | | |
| ITALICA Forms a bush three to four feet high and as much across, and blooms in early spring, bearing many panicles of flowers of an exquisite blue. It needs plenty of room and must be staked as the heavy branches are quite brittle, but it is well worth the trouble as a well-grown plant is very beautiful. Grow it in semi-shade. Rose-colored pyrethrum is a charming companion... | 3.50 | 25.00 |
| MYOSOTIDIFLORA (Siberian Bugloss) Apart from its botanical classification this has no resemblance whatever to <i>A. Italica</i> , except that they both like a shady situation. Very early in spring sprays of true forgetmenot flowers appear and at the same time the foliage starts to grow. The leaves are heart shaped, very large and a beautiful dark green. Growing to a height of one foot they spread into a splendid clump that remains in good condition and an ornament to the garden all summer. | | |
| Clumps should not be disturbed for several years as they increase in beauty yearly. | | |
| Try planting <i>A. Myosotidiflora</i> with clumps of <i>Doronicum Clusii</i> . Both bloom at the same time and both like rich, moist ground, and shade..... | | |
| | 5.00 | 35.00 |

| NOVAE ANGLIAE "BARR'S PINK" The finest of the tall fall asters, bearing quantities of rose colored, semi-double flowers in September | 3.50 | 25.00 |
| ASTILBE (Spirea) | | |
| AMERICA Light pink. | | |
| GLORIA Late flowering; deep pink. | | |
| GLADSTONE Pure white; early. | | |
| QUEEN ALEXANDRA June flowering, pink. | | |
| All Astilbes | 5.00 | 35.00 |
| BOLTONIA ASTEROIDES A good plant which would be more valued if it were not so easy to grow. Forms a bush six feet high, with clean gray green foliage which is smothered with pink buds and small white daisies in September | 3.00 | 20.00 |
| CAMPANULA PERSICIFOLIA See Specialties. | | |
| CERASTIUM TOMENTOSUM A trailer for the rock garden, with soft gray foliage and pretty white flowers..... | 3.00 | 20.00 |
| CHRYSANTHEMUM MAXIMUM (Shasta Daisy) | | |
| "MAYFIELD GIANT" Enormous flowers on long strong stems | 3.00 | 20.00 |
| CHRYSANTHEMUM "JAPANESE MOUNTAIN" A race of hardy chrysanthemums that are unsurpassed for garden decoration. They make shapely bushes two feet high that are covered with quantities of small single flowers in October. It is this variety that the Japanese train into their famous "cascade" chrysanthemums. In separate colors, pink and a soft old gold | 3.50 | 25.00 |

G E N E R A L L I S T — (Continued)

| | Doz. | 100 |
|---|------|-------|
| CHRYSANthemum COREANUM The new Korean chrysanthemum that has become so popular. Large, single white flowers in October. Absolutely hardy..... | 3.50 | 25.00 |
| COREOPSIS (Tickseed) | | |
| "MAYFIELD GIANT" This is a new strain from Australia, and is a great advance over any coreopsis hitherto produced. The plant is much taller and more vigorous, the stems longer and more sturdy, and the beautiful golden flowers very large and of good substance..... | 3.50 | 25.00 |
| DELPHINIUM | | |
| BELLADONNA HYBRIDS "CLIVEDEN BEAUTY".... | 3.00 | 20.00 |
| CHINENSIS "BLUE BUTTERFLY" | 3.00 | 20.00 |
| DIANTHUS (Hardy Pinks) | | |
| ARENARIUS (Sand Pink) Eight inches high. Fragrant, fringed white flowers in July. Needs dry soil and sun | 3.00 | 20.00 |
| ARVENENSIS Gray foliage and fringed pink flowers. Very sweet scented | 3.00 | 20.00 |
| DELTOIDES (Maiden Pink) A pretty creeper for the rock garden, with small rosy flowers..... | 3.00 | 20.00 |
| DELTOIDES ALBA White form of the above..... | 3.00 | 20.00 |
| PLUMARIUS Gray foliage, fringed, clove scented flowers | 3.00 | 20.00 |
| SPECIOSUS Grass-like foliage. Rosy Lavender flowers with deeply fringed petals and a most delicious perfume. Two feet high. Needs dry, sandy soil and sun.. | 3.00 | 20.00 |
| DICENTRA SPECTABILIS (Bleeding Heart) An old-fashioned favorite that has never lost its charm..... | 7.50 | |
| DIGITALIS See Specialties. | | |
| DORONICUM (Leopard's Bane) Shining, bright green foliage with masses of large golden daisies rising a foot above the leaves and blooming very early in spring. It is a fine flower for cutting, and after the flowers are gone the beautiful foliage remains in good condition all summer. Needs a shady place and plenty of moisture, and division every other year | 5.00 | 35.00 |
| EUPATORIUM COELESTINUM (Hardy Ageratum) This is an invaluable plant for the autumn, providing as it does a mass of beautiful lavender blue all through September and October. Try it in front of the hardy aster "Barr's Pink." They are in bloom at the same time, the colors blend beautifully, and the Eupatorium, which grows about two feet high, makes an ideal screen to hide the bare stems of the asters. | | |
| Eupatorium is about the latest of all the perennials to appear in the spring, not showing above ground until June. Divide every year | 3.00 | 20.00 |
| GAILLARDIA (Blanket flower) | | |
| "THE DAZZLER" Very large, showy flowers, copper red with a yellow border. One of the few perennials that bloom continuously all summer..... | 3.00 | 20.00 |
| GAURA LINDHEIMERI Slender, graceful stalks, three to four feet high, bearing small white flowers with rosy buds. It should be planted in the background and the long branches allowed to fall over at will among flowers of strong color that needs softening, such as the midsummer phlox. The dancing little white flowers appear all summer | | |

TALL, BEARDED IRIS

While August and September are the best months of the year in which to plant Iris, it may be planted in spring with perfect safety, and it will bloom the same year if it is put in very early before growth begins.

Any garden soil is suitable for Iris. The only necessities are thorough drainage and sunshine. Do not use manure in the ground. If it is necessary to fertilize, use bonemeal.

The figures following the name of a variety are the official ratings given by the American Iris Society, the first figure being the rating as an exhibition flower; the second figure being the rating for its landscape or garden effect. Any iris rated above 80 is considered exceptionally good.

The name and date given in parentheses are the name of the originator and the year the variety was introduced,

WHITE

Dozen

TAJ MAHAL, 82-81 (Sturt. 1921), 36 inches. A lovely, pure smooth white. Fine form, rugged constitution and free flowering. **\$10.00**

YELLOW

AMBER 88-88 (Dykes, 1924), 36 inches. Deep yellow with reddish gold beard. Many authorities consider this the finest yellow yet introduced. Award of Merit from R. H. S. of England **10.00**

LAVENDER

LORD OF JUNE, 88-78 (Yeld, 1911), 40 inches. A huge stately flower, soft silvery blue. Fragrant **4.00**

MOTHER OF PEARL, 84-84 (Sturt. 1917), 44 inches. A very large perfectly shaped flower, pale blue with iridescent Mother of Pearl coloring, and a white throat overlaid with gold. Very lovely. **4.00**

SOUVENIR DE LOETITIA MICHAUD, 92-90 (Millet, 1923), 48 inches. An exquisite, soft blue. Perfection in color, form, substance and fragrance, as witnessed by the very high rating.
\$2.50 each.

PINK

APHRODITE, 81-88 (Dykes, 1922), 44 inches. Soft, bright pink with a white flush at the throat. Fragrant. One of the best and tallest of the pinks. It sold for \$50 six years ago and is still quite rare. . **10.00**

DREAM, 84-84, (Sturt., 1918), 38 inches. Soft, clear, uniform pink tone. Delightfully pretty, and very popular. **4.00**

G E N E R A L L I S T — (Continued)

FRIEDA MOHR, 89-85, (Mohr, 1926), 42 inches. A gigantic pink toned iris, the flowers measuring from six to seven inches in each direction. Of perfect form and brilliant coloring. One of the largest irises in cultivation, free flowering and with a long blooming season. Outstanding among recent introductions.

\$2.50 each.

RED

| | Dozen | |
|--|-------|--|
| OPERA , 82-83 (Vilm. 1916), 24 inches. A glorious rich velvety, violet red. A profuse bloomer and very popular..... | 4.00 | |
| SEMINOLE , 83-83 (Farr, 1920), 30 inches. A masterpiece of the late B. H. Farr. Rich, velvety crimson, different in color and form from Opera | 4.00 | |

BRONZE

| | | |
|---|------|--|
| AMBASSADEUR , 92-91 (Vilmorin, 1920), 42 inches. The membership of the American Iris Society voted this iris the most popular in the world. It is a regal flower of smoky, velvety bronze and maroon, of perfect form and good texture, on stout, erect stems. The color defies description but in certain lights the effect is rich. ruby red | 5.00 | |
|---|------|--|

VIOLET

| | | |
|---|------|--|
| LENT A. WILLIAMSON , 88-88 (Wmsn. 1918), 42 inches. Standards soft campanula violet and falls velvety pansy violet, with yellow at the throat and a rich golden beard. Perfect form and petals of great substance. One of the very finest garden irises..... | 4.00 | |
|---|------|--|

| | Doz. | 100 |
|---|--------|---------|
| LEONTOPODIUM ALPINUM (Edelweiss) The most famous of rock plants. It is associated in song and story with the glories and dangers of the high Alps. Silvery white leaves with star-like wooly white flowers growing about six inches high | \$3.50 | \$25.00 |

LINUM (Flax) The blue of flax is in a class by itself. There is nothing else quite like the lovely color produced by the clouds of small flowers dancing on the slender gray stems. The flowers drop every afternoon, and every morning throughout the summer a new crop appears. Light, dry soil and a sunny position suit these plants.

| | | |
|---|------|-------|
| NARBONENSE The most beautiful variety with larger flowers of a deeper blue than Perenne, but not such a prolific bloomer | 3.50 | 25.00 |
|---|------|-------|

| | | |
|---|------|-------|
| PERENNE Flowers all summer in the greatest profusion | 3.00 | 20.00 |
|---|------|-------|

MYOSOTIS ALPESTRIS (Forgetmenot)

| | | |
|--|------|-------|
| SUTTON'S ROYAL BLUE A beautiful strain of this lovely spring favorite | 3.00 | 20.00 |
|--|------|-------|

NEPETA (Catnip)

| | | |
|--|------|-------|
| MUSSINI A lovely trailer for the rock garden and an excellent edging plant for the border. Velvety gray, aromatic foliage, and soft lavender flowers appearing from time to time all summer. It should be clipped back frequently to keep it within bounds..... | 3.00 | 20.00 |
|--|------|-------|

OENOTHERA (Evening Primrose) Both the species below open their flowers in the day time. They are easily grown in sandy soil in a sunny position.

| | | |
|--|------|-------|
| FRASERI Handsome bushes two feet high with quantities of golden yellow flowers. Beautiful for cut flowers | 3.00 | 20.00 |
|--|------|-------|

G E N E R A L L I S T — (Continued)

| | | |
|--|------|-------|
| | Doz. | 100 |
| MACROCARPA For the rock garden. A trailer, with rosy stems and smooth gray foliage, bearing enormous solitary golden flowers | 3.00 | 20.00 |
| PENTSTEMON (Tall Beard-tongue) This plant is not used nearly as much as it merits. It is one of our best perennials, very hardy, and easy to grow. The clean smooth dark green foliage persists all winter. In June it throws up tall slender stems, four to five feet high, that are hung with fairy horns of clear, soft coral, giving a rosy, misty effect that is very beautiful. It should be divided every year after flowering | 3.00 | 20.00 |
| PHLOX DIVARICATA The "blue phlox" of early spring. Ten inches high with large lavender flowers that make most beautiful masses or "drifts" of color in open woods, or a shady place in the rock garden. | 3.00 | 20.00 |
| PHLOX PANICULATA The great standby of the garden in midsummer, these phloxes provide the most brilliant display of color in July. They should be planted in very rich, deep soil, and divided every third year. They should not be allowed to suffer for lack of water, and should never be allowed to go to seed. The flowers will keep their color better if they have some shade. | | |
| ENCHANTRESS A soft salmon pink with very large trusses. Similar to the well known Elizabeth Campbell but a more vigorous grower | 3.50 | 25.00 |
| MILLY VON HOBOKEN Clear, bright pink. Enormous individual flowers in large trusses. A very fine phlox | 3.50 | 25.00 |
| MRS. JENKINS Tall, pure white. An old variety but still unsurpassed | 3.00 | 20.00 |
| MISS LINGARD Early flowering white. Blooms continuously from June on through the summer, and is distinguished by the dark green shining foliage which never becomes diseased | 3.00 | 20.00 |
| THOR An intense, glowing, deep salmon pink. The color has a "carrying" quality that is quite remarkable. | 3.50 | 25.00 |
| W. C. EGAN A pretty light pink. A good phlox for situations where the more brilliant colors are not desired. | 3.00 | 20.00 |
| PHYSOSTEGIA VIRGINICA (False Dragonhead) Long spikes of delicate pinkish flowers in August. A beautiful cut flower. Should be divided every year as it multiplies tremendously | 3.00 | 20.00 |
| PLATYCODON (Balloon flower) | | |
| GRANDIFLORA MARIESII A very hardy plant, valuable for the rock garden as well as the border. It bears large, soft blue open bells from July until frost. | 3.00 | 20.00 |
| MARIESII ALBA White flowered form of the above. | 3.00 | 20.00 |
| POLEMONIUM COERULEUM (Jacob's Ladder) No perennial has prettier foliage than Polemonium with its fresh green, fern-like leaves. The spikes of soft blue flowers come early in spring and rise about two feet high. They are lovely and lasting cut flowers. | 3.00 | 20.00 |
| POTENTILLA (Cinquefoil) An ornamental plant for either the rock garden or the front of the border, with strawberry leaved foliage and small, brilliant red flowers over a long period. Very hardy and easy to grow. Increased by division of the roots | 3.50 | 25.00 |

G E N E R A L L I S T — (Continued)

| | Doz. | 100 |
|--|------|-------|
| PRIMULA (English Cowslip) This member of the great family of primroses is perfectly hardy in our climate. It prefers a situation where it will have slight shade, and it delights in heavy, rich ground and plenty of moisture. It blooms with the first opening of spring and then there is nothing to compare with the brilliancy of its flowers. The clumps should be divided every other year soon after flowering. | | |
| The strain offered here bears flowers in shades of bronze and red | 3.50 | 25.00 |
| PYRETHRUM ROSEUM (Painted Daisy) Rose colored daisies, two to three inches across in May and June. | 3.50 | 25.00 |
| SALVIA TENORII Two feet high. Spikes of violet flowers in June. A very fine color | 3.00 | 20.00 |
| SCABIOSA CAUCASICA See Specialties. | | |
| SIDALCEA (Greek Mallow) A valuable plant for the July garden and not as well known as it should be. The foliage is exceptionally beautiful at all times. The dainty flowers, like miniature hollyhocks, are borne on four foot stems and come in clear bright shades of rose and pink. Very hardy and easily grown in a sunny position. Should be divided every other year | 3.50 | 25.00 |
| STOKESIA (Cornflower Aster) A handsome native perennial blooming from late summer to frost. The very large double flowers are a beautiful cornflower blue and are exceptionally fine in form, color and texture. Needs light sandy soil, good drainage and full sun. Increased by division in spring | 3.00 | 20.00 |
| SWEET WILLIAM See Specialties. | | |
| THALICTRUM ADIANTIFOLIUM (Maidenhair Meadow Rue) | 3.00 | 20.00 |
| TROLLIUS See Specialties. | | |
| VERBASCUM (Mullein) | | |
| HARKNESS HYBRIDS Biennials. Golden flowers. Magnificent tall spikes | 3.50 | 25.00 |
| PHOENICEUM Eighteen inches high. Flowers, white, pink and purple | 3.00 | 20.00 |
| VERONICA (Speedwell) All the Veronics are beautiful and valuable plants. Very hardy and easy to grow, and easily increased by division. In a new garden they should be used freely as they quickly grow into large clumps. | | |
| AMETHYSTINE Long trailing stems with soft blue flowers in June. Fine for the rock garden. | 3.00 | 20.00 |
| SPICATA Spikes of fine blue two to three feet high. If the flowers are cut before seeding, new spikes will appear all summer | 3.00 | 20.00 |
| VIRGINICA (Culver's Root) Four feet high. Spikes of white flowers | 3.00 | 20.00 |
| VIOLA See Specialties. | | |

"PERENNIAL GARDENS" by the well-known landscape architect, H. S. Orloff, is a splendid little book with many ideas for those who have a vision of a garden, not merely a collection of plants, and who need some help in achieving their ideal. It will be especially helpful to the owner of a small plot who wants to work out his own ideas of developing it. Price **\$1.25.**
